Chandranna Bima Scheme

1. Scheme Overview & Objectives

The Chandranna Bima, previously known as YSR Bima, is a targeted social security scheme engineered by the Government of Andhra Pradesh to provide robust insurance protection to unorganized workers and families living below the poverty line. Administered by the Labour Department, its primary objective is to safeguard vulnerable households from financial destitution following the sudden death or disabling injury of their primary breadwinner. The scheme operates on a 100% state-funded premium model, meaning registered beneficiaries do not have to pay any recurring out-of-pocket premiums.

2. Strict Eligibility Criteria

To access the financial protections, candidates must be primary breadwinners belonging to unorganized worker classifications. They must be between 18 and 70 years old at the time of enrollment. The household's economic status must be validated by an active White Ration Card or Rice Card. Exclusions apply to permanent government personnel, individuals under EPF or ESI coverage, active income taxpayers, and families owning private, non-exempt commercial vehicles.

3. Compensation Structure & Benefit Slabs

The financial disbursements vary depending on the nature of the tragic incident and the exact age category of the covered individual. In the event of an accidental death for a beneficiary aged between 18 and 70 years, the insurance provider issues a payout of Rs. 5,00,000. Similarly, cases of permanent total disability for the same age bracket also secure a Rs. 5,00,000 compensation from the insurance provider. For permanent partial disability affecting individuals between 18 and 70 years, the insurance provider covers up to Rs. 2,50,000 based on severity. If a natural death occurs to an earner aged between 18 and 50 years, the state directly allocates a budgetary payout ranging from Rs. 1,00,000 to Rs. 2,00,000. Furthermore, immediate funeral relief ranging from Rs. 5,000 to Rs. 10,000 is provided from the local secretariat fund across all eligible age groups.

4. Mandatory Documentation

Claimants must gather and submit specific documents to initiate the verification pipeline. Identity proofs require Aadhaar card copies of both the primary earner and the designated nominee. Household poverty status is proven via a valid Andhra Pradesh Rice Card or White Ration Card. For financial routing, an Aadhaar-seeded active bank account passbook copy belonging to the nominee is mandatory. In cases of natural death, a Death Certificate from a competent registrar is required. For accidental claims, a First Information Report, Police Inquest Report, and Post-Mortem Examination statement must be attached. Disability claims necessitate a certified medical certificate from an authorized Government Medical Board stating the definitive percentage of impairment.

5. Claims Pipeline & Verification Channels

The settlement workflow begins with the nominee promptly reporting the incident to the designated local Grama or Ward Sachivalayam. Local field personnel then verify details to process immediate funeral support within 2 to 4 business days. Following this, the Welfare and Education Assistant scans and uploads verification documents directly onto the state bima system. Once approved across regional tiers, the core funds are automatically distributed straight to the beneficiary via the Direct Benefit Transfer mechanism into their active Aadhaar-linked bank account within 15 to 30 days. Citizens can track claim status and enrollments via official government portals at chandrannabima.ap.gov.in or bima.ap.gov.in, or seek direct processing help at their nearest secretariat office.
